DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 38-39 and 46-47 have been rejected under 35 U.S.C. 103(a) as being unpatentable over Matsushima, 6510595. Matsushima fails to disclose a closure bar groove in the lower seal member. Matsushima discloses a notched out area for the closure bar to act on the lower seal member. Figure 14, labeled as prior art in Matsushima discloses a closure bar on a slider for engaging a closure bar groove on a lower seal member. This is merely a design equivalent means for attaching the slider to the seal members to bring the seal members together to close the zipper. It works just as well as Matsushima's arrangement. Therefore, it would have been obvious to a person having ordinary skill in the art to substitute the slider/zipper/groove arrangement of figure 14 for the arrangement shown in the other figures of Matsushima as it would yield the predictable result of a slider closing an upper and lower seal member.

3. Applicant's arguments with respect to claims 38-39 and 46-47 have been considered but are moot in view of the new ground(s) of rejection.
